Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by ES 276 900.

The '900 reference discloses a generic liquid measuring and dispensing arrangement for domestic liquids (i.e. Examiner considers domestic liquids to include cleaners, detergents, and liquids of medicinal purposes that can be as simple as water) comprising a bottle 7, a cap 5 and a measuring device including a socket 3 and a concavity 1 for measuring and dispensing liquid.

In regard to claim 7, the method as claimed would be inherent during normal use and operation of the device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over ES 276 900 in view of DE 83 33 126.

Art Unit: 3751

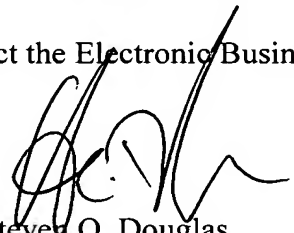

The '900 reference discloses a liquid measuring and dispensing arrangement (supra), but is silent as to whether the concavity includes associated graduations. The '126 reference discloses another liquid measuring and dispensing arrangement having a concavity with associated graduations 3 to facilitate precise measurement. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the concavity of the '900 device to have graduations in view of the teachings of the '126 reference to facilitate precise measurements of liquids.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The DuBose, Swartwout and Carr references pertain to containers with associated measuring devices.
